Please reject NAB's petition 04-160, a blatant attempt to stifle competition by the same group that continually tries to prevent entry into free markets rather than face competition..

If the NAB and broadcasters had their way, there would be no FM radio, no television, no cable television, no satellite TV, and now no satellite radio. Based on this record of opposition to innovation, how can the FCC treat anything they say with credibility?

Please say "NO" to this un-American, anti-freedom attempt to continue feeding at the public trough without the need to innovate & compete - the free market has spoken, and says "NO" to this kind of anti-competitive petition to limit freedoms.
